Watermark Student Learning & Licensure – Gateways

The Next Evolution of Insight into Student Performance

Watermark Student Learning & Licensure (SLL) is purpose-built for Schools of Education, Social Work, and other similar programs to help educators measure student performance with ease. Gateways is an emerging module in SLL that allows faculty and administrators to monitor curricular and non-curricular requirements throughout a program, from acceptance to licensure. It shifts the focus onto individual students, providing a clear way to understand their status to ensure the progress they make translates to success.

Streamline Requirement Tracking

- Group students by anticipated graduation date
- Review candidate requirements by stage, cohort, or other details
- Create custom licensure plans to follow specialized requirements
- Bulk approve items pending review

Empower Student Success

- Access personalized licensure plans
- Upload and submit supporting documentation for review
- View supplied materials and track which requirements have been confirmed

One Location, Abundant Insights

Gateways aggregates multiple tools and datasets into a single overview, including supporting documentation and artifacts. Centralizing student data creates an in-depth, intuitive look at student performance across the entirety of the program. Dive deep to easily manage individual placement requirements, or expand the scope to derive new insights beyond the standard portfolios. Gateways provides a holistic view of student progress, making it easier for programs to support faculty and student success, assess student performance and program effectiveness, and illuminate opportunities for improvement.
