

Watermark Course Evaluations & Surveys + Faculty Success

Seamlessly incorporate course evaluation data into faculty reviews.

Many faculty and administrators spend hours each review cycle manually attaching course evaluation results to faculty activity reports and promotion and tenure dossiers.

Watermark has made it easier than ever to surface the data you need to inform critical faculty review processes. Because wouldn't it be nice if it was just **simple**?

How it works

The integration works through a connection between data in the Course Evaluations & Surveys and Faculty Success systems. Each time the window for course evaluations closes, results from the Course Evaluations & Surveys system are linked to courses listed as part of the collection of activity data in Faculty Success. Then, faculty members can easily view their course evaluation results along with their other activities and accomplishments, and include them as evidence for annual review, promotion and tenure. This saves hours of tedious work and creates a significantly improved experience for faculty as they prepare for high-stakes reviews.

Simple integration, powerful impact

The Course Evaluation & Surveys + Faculty Success integration supports:

- Annual review
- Promotion and tenure
- Team-taught courses

Time savings

A university with 500 faculty will save approximately 125 hours and more than \$6,000 per semester – time and money that could be spent in far more meaningful ways.

- No more “export, reformat, import” each term
- Import results for multiple courses at a time

Increased efficiency

- System manages the mapping
- No copy/paste, hunting for files, or switching back and forth between screens

More valuable insights

- In-context reports inform critical review processes
- Break down data silos and support your needs for a more complete picture of effectiveness

Insights inspire progress. Watermark's solutions give higher education institutions the insights they need to improve, evolve, and empower student success.
