# Assessment Projects

Streamline data collection, scoring, and reporting on learning outcomes achievement with project-based, juried assessment

- ▶ Conduct juried assessment of programmatic and institutional learning outcomes
- ▶ Make it easy and efficient to score student work against standard rubrics with assigned queues and user-friendly tools
- ▶ Upload artifacts swiftly with self-service tools
- ▶ Mitigate bias, support more equitable assessment practices, and save time with random sampling and randomized distribution of student artifacts
- ▶ Drive accuracy with automatic discrepancy checks and tie-breaker settings
- ▶ Run rubric calibration projects to coach inter-rater reliability
- ▶ Housed inside Student Learning & Licensure, use it on its own or manage all of your program and course-based assessments in one seamless place

Fields marked with \* are required.

## Project Details

### Project Title\*

Critical Thinking

17/100

### Project Description

In this critical thinking assignment, students are tasked with analyzing a relevant social issue of their choice. They must critically examine various perspectives, gather evidence from credible sources, evaluate the impact of the issue on individuals and society, and propose thoughtful solutions or interventions. Through this assignment, students develop their analytical skills, deepen their understanding of complex social issues, and engage in constructive dialogue.

### Learning Outcomes\*

Leadership, Student Learning Outcome 1

+2 ▾

## Scoring Details

### Random Sampling

100

%

Percentage of artifacts to be randomly selected for evaluation.

### Evaluation Count

2

The number of evaluators assigned to assess each learning outcome for every artifact.

**Score Discrepancies:** If the Evaluation Count is 2, a discrepancy check can be enabled within each activity. Artifacts that have a rubric score discrepancy will be automatically assigned to an additional evaluator.
