

What sets Watermark Course Evaluations & Surveys apart?

Concerned about low survey response rates? We can help. Get high-quality, actionable feedback with Watermark.

“One of the most notable improvements has been in our student response rates. With our previous system, we struggled to reach a 30% participation rate. Since implementing Watermark, [our response rates have soared to 75%](#), making our course evaluation data far more representative and actionable.” – Roger Y., Vice President of Academics

	An elevated end-to-end campus feedback system	Watermark Course Evaluations & Surveys	Other vendors
	Response Rates	Consistently strong response rates (70%+ on average) for insights you can trust.	Often unsatisfactory response rates.
	LMS & SIS integration	Seamless integrations with major LMS & SIS solutions. Students respond directly in the LMS with automated reminders that drive participation.	Incomplete, unreliable integrations that increase burden on staff and fail to engage students.
	Survey customization	Surveys your way – flexible and tailored by program, course, instructor, or modality.	Limited or costly customization.
	Reporting & analytics	Immediate, intuitive reporting with clear trends and actionable insights.	Slow, clunky reporting that can be difficult to analyze
	Instructor access	Dashboards and AI-driven insights mean feedback is meaningful and easy to act on – empowering faculty in the process.	Limited faculty-facing tools. Reports are hard to interpret and apply.
	Time savings	Quick, guided implementation in as little as 6–8 weeks to get up and running fast.	Long, resource-heavy implementations with high IT demands.
	Campus-wide integrations	Connects seamlessly with Watermark’s assessment and faculty review solutions for broader impact to help you turn data into action.	Siloed from other institutional systems.
	Expert services & support	Dedicated, higher-ed-focused support team that resolves issues quickly.	Generic, slow-to-respond support.
	Innovation	Actively evolving to remain ahead of your needs with new features like Instructor Insights for AI-powered recommendations.	Stagnant solutions with limited innovation.
