

Watermark Student Learning & Licensure

Showcase holistic learning and track students' program journeys – all in one place

Gain 360° insights into student learning and rigorously assess outcomes, both in the classroom and the field. Guide students to success with robust candidate tracking from the application process to placement for internships, clinicals, and educator prep, to licensure.

- Give students one place to complete assignments, organize artifacts, and log time for field experiences.
- Assess a variety of coursework for a full view of progress and reports to showcase results.
- Assign and coordinate detailed placements for clinical programs and gather assessments directly from supervisors, all in one system.
- Track student progress towards a degree and licensure with documented requirements and tools to capture evidence of completion.
- Create student ePortfolios that showcase the entire learning journey and power future success – for the student, the assessor, and the program.

Clear, consistent assessment and flexible reporting with common rubrics

Easily embed common rubrics into coursework and fieldwork to provide consistency and show student progress. Reports enable instructors to better support student needs and help administrators identify program improvements. Your reports easily support your institution's narrative around results and continuous improvement.

Coordinate clinicals and educator prep placements in a centralized tool

Placement coordinators can efficiently build a network of sites and site staff to facilitate the placement process. Match students with mentors and supervisors. Leverage automated notifications to external mentors to initiate the field experience.

Track and assess student progress from admissions to licensure

Give students and the faculty administrators who support them a comprehensive view of their performance throughout a program, from start to finish. Manage requirements, facilitate applications to the program and field, capture the documentation needed for placement and accreditation, and quickly understand whether students have met program requirements and are making progress toward licensure.

Equip students and administrators to showcase learning with ePortfolios

ePortfolios capture evidence of the skills and knowledge attained from courses, fieldwork, and other learning experiences. They give students an asset to confidently market themselves for employment and other pursuits. Provide evidence of outcome achievement and program quality for state reporting and programmatic accreditation.

Streamline access and strengthen your toolset with integrations

With LTI-compliant integration with all major providers, Student Learning & Licensure becomes an extension of your LMS. Students and faculty access their work easily from a familiar system, and grade passback ensures grades flow to and from your LMS gradebook, eliminating duplicate entries. Plus, leverage your existing Turnitin integration for plagiarism detection to encourage authenticity in student work.

Added support for educator prep programs

Colleges of Education can leverage an integration with the NCES database to identify placement sites and pull in reporting metrics on site demographics. Additionally, partnerships with SCALE's edTPA and disposition assessment with EDA tools.

Part of the Watermark product suite

Data from Student Learning & Licensure flows directly into Watermark Planning & Self-Study to support accreditation and continuous improvement efforts.
